MISSION TO JUPITER PART THREE

BY

JASON WELCH

Near the center of our galaxy is a large moon orbiting a gas giant .
A living habitat for all the Ambassadors of the Galaxy Federation made with a help of V-O-C robots from KALDOR .
HERE the Ambassadors meet To make decisions that affect the whole Galactic Empire .
CHIEF MOVER POUL arrives at tracking station and receives report from TAM MENZIES.
TAM MENZIES An unidentified craft in the western spiral arm of the galaxy moving high speed away from Sol 3 .
CHIEF MOVER POUL Carry on tracking it and relay what you have to me before I summon the high council .
He takes a travel tube that whisks him in 4 directions through the complex of CANDEREL and walks out and along an upper steel gantry then down the spiral ramp that takes him to the council chambers .
The ambassadors are sitting around an ornamental fountain near a refreshments kiosk when a large tannoy speaker announces in a synthesized voice
this session of the high council is starting now
CHIEF MOVER POUL Ambassadors how are you if you like to make your way into the council chambers we have some astounding news .
From the left comes president Vanessa Bellamy followed by General Williams .
PRESIDENT VANNESSA BELLAMY As that this threat to the multiverse has been averted and your contracts are up for renewal .
They make their way down the white corridor with red Windows evenly spaced to the blue and pink door with the emblem of the galactic federation emblazoned in gold and take their seats
PRESIDENT VANNESSA BELLAMY arrives with KURT from CLANERIA X and CHIEF MOVER POULI joins her at the front of the stage

CHIEF MOVER POUL Madam president I've had a report of an unidentified craft leaving sol 3.
PRESIDENT VANNESSA BELLAMY But as we know the whole of the areas being quarantined
GENERAL WILLIAMS The only m class planet being sol 3
AMBASSADOR SONDAR Who only invented crude space travel as an afterthought after trying to blow themselves up with missiles .
CHIEF MOVER POUL We decided not to contact them .
AMBASSADOR SONDAR The petty squablings of humans of no interest to the draconian empire
GENERAL WILLIAMS if you bear with us AMBASSADOR SONDAR
From the back of the auditorium GENERAL WILLIAMS escorts VLAD TEPESH from ARCADIA
AMBASSADOR SONDAR Yes VLAD what can I do for you
VLAD TEPESH Your latest shipment to Arcadia have been so generous We wanted to come and lend a hand madam president
VLAD TEPESH is before her with his Viking uniform costume fur topped shoulder pads silver sash wooden shield and and swords through a belt at his waste .
AMBASSADOR SONDAR Don't be in too much of a hurry Vlad the DRACONIAN EMPIRE is expanding quicker than ARCADIA
PRESIDENT VANNESSA BELLAMY To the point where we have to find new M-Class planets.
Are you sure the people of SOL 3 actually want to colonize there area of space .
VLAD TEPESH it seems right for the for the ARCADIANS who are flourishing since you discovered Arcadia
GENERAL WILLIAMS CENTINAL SIX will monitor this new craft from the humans of SOL 3
AMBASSADOR SONDAR it represents no military threats to the galactic federation
CHIEF MOVER POUL and once a year we send CENTINAL SIX to an orbit around their planet to monitor the communication
GENERAL WILLIAMS THERE SIMILAR TO US WITHOUT THE MANAGEMENT SKILLS
CHIEF MOVER POUL I KNOW WHAT YOU MEAN, THEY WHEREN'T BROUGH UP LIKE US .

PRESIDENT VANNESSA BELLAMY ``` According to the latest transcripts from the sociology department they're still waging war with their brothers in neighboring districts .
GENERAL WILLAIMS So that area of the galaxy is still a no-go area for commercial space traffic .
VLAD TEPESH I must protest madam president with the DRACONIANA and the V-O-C robots we can colonise any part of our galaxy now and if the humans of SOL3 don't want anything we do .
CHIEF MOVER POUL I'll go back to the monitoring station and program sentinel 6 to shadow the craft to its destination
GENERAL WILLIAMS you do that analyze the craft and send its blueprints to the technical section of the galactic federation .
CHIEF MOVER POUL If it follows it's currently trajectory iit should be passing the gas giant SOL 5 known as Jupiter .
KURT Since I conceded presidency of CLANERIA X to SYLVESTER SNIGGLEY of the Liberal Party my time is my own so I'm willing to transport your back to ARCADIA in my solar yacht
VLAD TEPESH You'll be made welcome they'll be a banquet in your honor and PANS PEOPLE are on toUR
KURT The TIGER MOTH Is ready with a full crew though it might take a while sailing the solar winds .
PRESIDENT VANNESSA BELLAMY Set sale then KURT I've never traveled on a solar yacht before though have the tie Fighters ready encase we run into trouble it's a big universe out there .
All the assembly file out of the council Chambers towards the docking bays where the solar yacht TIGER MOTH is waiting and the draconian Ambassador goes back to his quarters to report in to his emperor .
CHIEF MOVER POUL I'll escort you down to the docking bay and then go to the operations room to reassign sentinel 6 .
KURT You gonna nap for notes the new TIGER MOTH she's had a refit
The whole party takes a walk through the reception to the council offices past the ornamental fountain to a metal alcove in the corner and a light and travel to you which takes them to the docking bay
KURT It should be quite a race if you don't mind moving the rigging manually to catch all the solar winds from maximum acceleration
PRESIDENT VANNESSA BELLAMY As long she makes it

to Arcadia
VLAD TEPESH Wine women and song in no particular order
CHIEF MOVER POUL leaves them and walks to the operations room on the other side of the space station we're operators are monitoring and coordinating .
SV12 I have an incoming ship coming out of the DIMENSION GATE above commander .
POUL Leave the outcome and walk through the hexagonal guardrail so his command chair
SV12 Iit's registered as the CHUMBAWAMBA inbound from GALDA PRIME and it's lining up with theTIGER MOTH
POUL that'll be another one of those SOLAR YACHT from the look of them it's a long torpedo shaped body with solar cells
TAM MENZIES they angle the sails manually to get the solar wind .The idea of being you can travel long distances without engine .
POUL VERY popular among the richer citizens
POUL get me CARNELL on KALDOR
From the large monitor in the center of the operations room the screen saver of the galactic Federation is replaced by the profile of CARNELL
POUL PRESIDENT VANESSA BELAMY has gone with KURT on his TIGER MOTH space yacht and she might be away for a while
CARNELL I'LL get the news agencies to play it down as reports of the lifestyle of the ARCADIANS is getting more sensational throughout the empire
POUL Really can't have more citizens wanting to defects to Arcadia
CARNELL exactly nobody will get any work done
CHIEF MOVER POUL Show me the console for the Western spiral arm of the galaxy
TAM MENZIES shows him past V-O-C robots manning communications consols to an alcove ,where v36 is stationed .
TAM MENZIES Not much action in that part now the area is generally quarantined due to its one sentient lifeform on SOL 3
CHIEF MOVER POUL We've we've been tracking a capsule leaving that area v36 you are relieved go back to your docking station and upload today's journal

TAM MENZIES activates the V-O-C robot piloting CENTENNIAL SIX .
TAM MENZIES Your orders are to intercept this capsule leaving SOL 3 and Shadow it to its destination .
TAM MENZIES after a quick direction it seems the capsule from sole 3 is heading for SOL 5 the gas giant
POUL V21 full survey of this ship but avoid contacts if there are any occupants avoid contact .
TAM MENZIES You can look in the viewing poles to see if there's any occupants but try not to scare them .
CHIEF MOVER POUL analyze and send the reports to us if you get a chance space walk over for a thorough search in the craft and report your findings .
